

Pioneering Technology Comes To Atlanta “Helping Organizations Reduce Cost”

The revolutionary alternative energy company that
converts mixed waste plastics into
synthetic crude oil.

Waste Plastics Wanted

- High Acceptability
- All Resin Types
- Mixed and or Contaminated
- Pre-Cleaning Not Required
- The System: **Versatile & Tolerant**

Proven Technology

- Fully Developed
- Commercially Proven
- Proprietary and Patented

Atlanta Operations

- Conveniently Located
- 24 hrs./Day—7 Days/Week
- Large Daily Capacity
- Transportation Available

Environmentally Sound

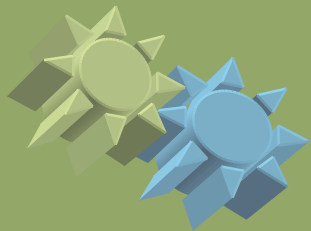

- EPA Approved
- Landfill Avoidance
- Eco-Sustainable Solution
- Recovery of Wasted Energy

GenAgain Technologies, LLC is pleased to announce the March 2013 opening of our Atlanta Facility, located at 2285 Sweetwater Ind. Blvd., Lithia Springs, Georgia, 30122.

Our Company’s platform will utilize a patented process that converts mixed waste plastic into synthetic crude oil. The system is designed to handle the inherent heterogeneity and contamination seen in mixed waste plastic.
